It is the highest quality oil with exceptional organoleptic properties and low acidity. All the olives we produce are Arbequina, the smallest of all the varieties and the most famous for the fineness of its oil.

ORGANIC EXTRA VIRGIN OLIVE OIL

This organic oil has been produced from organically-grown Arbequina olives, without chemically synthesised fertilisers or pesticides, yielding a final product without any traces of these substances.

This process not only makes for superior-grade extra virgin olive oil of the highest quality, but also one that respects the environment. Organic certification ensures the entire process of production, preparation, bottling and sale has been performed under strict control.

El Cogul is a small village of 190 people and lies 22 km south of Lleida in Catalonia. It is far from any major roads, with the nearest being the Lleida to Flix road some 10 km away.

Oli

Rupestre del Cogul®

But if there is one thing that makes el Cogul unique, then that is its over 10,000-year-old cave paintings which are part of the Rock Art Routes and have been declared a World Heritage site by UNESCO.

The headquarters of the Camp de Cogul Cooperative is on the north side of the village and consists of a group of buildings each of which is used for a specific activity.

The old mill is now a small museum about olive oil production and also has a shop selling some of the cooperative's products.
